Disadvantaged in Schools

When working with schools, we take a rounded view of the quality of education provided, including for the most disadvantaged pupils, which includes SEND.

The formal definition :

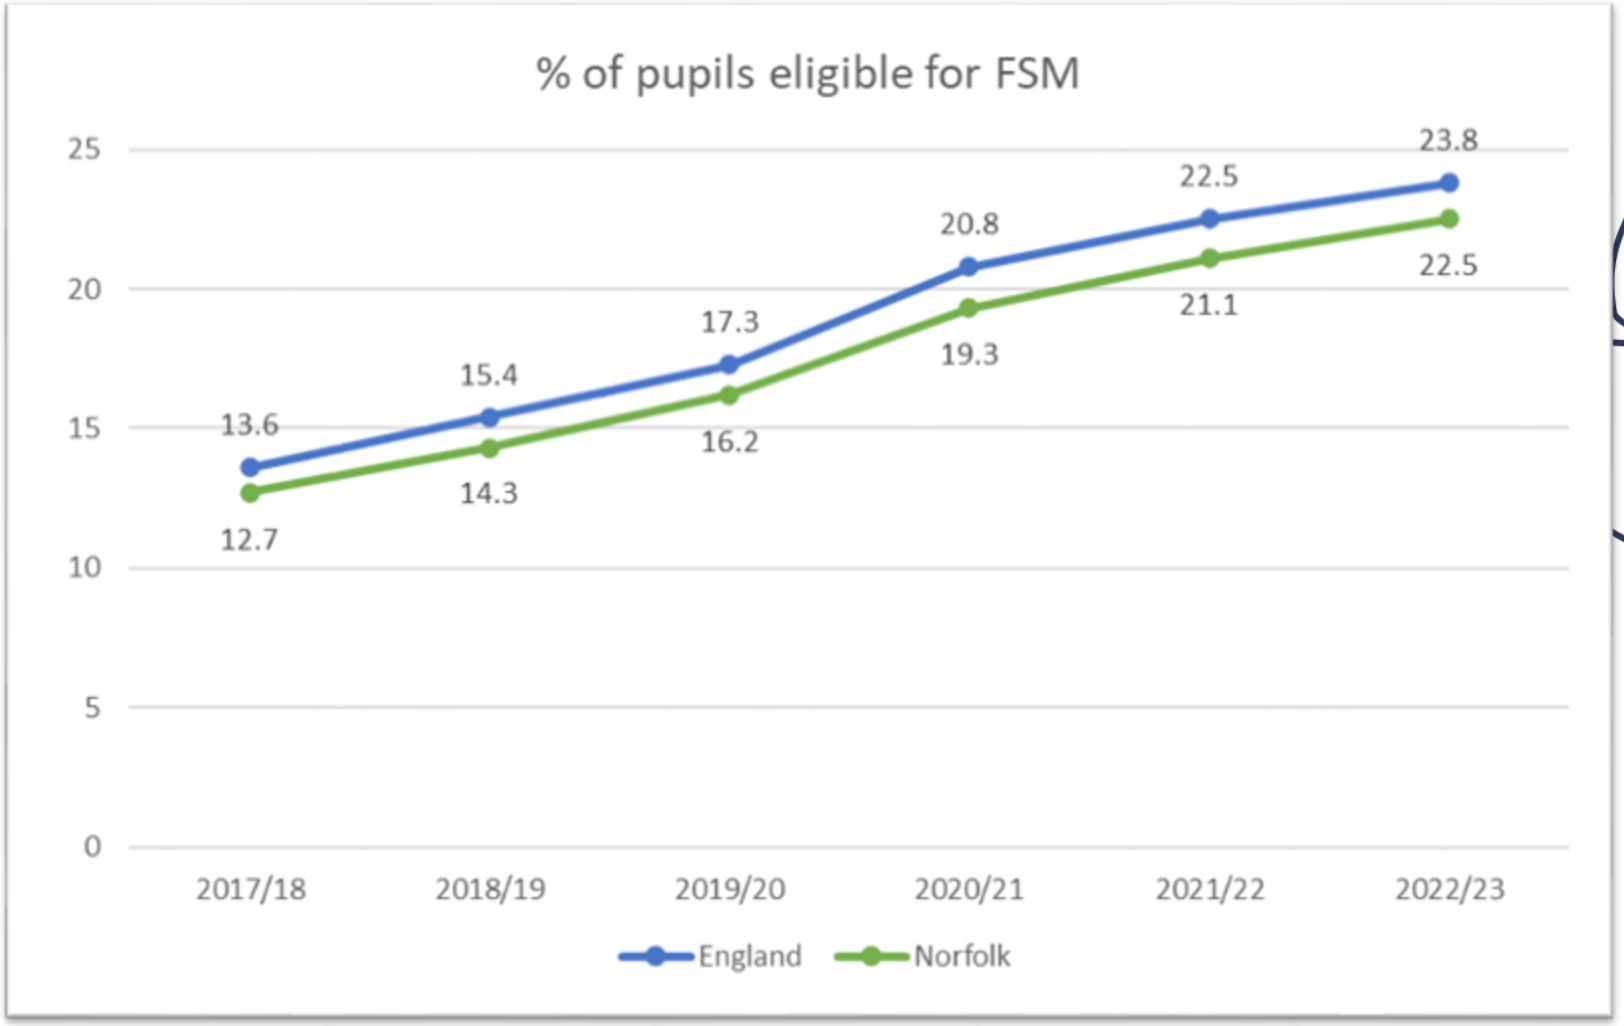

- those who have been in receipt of FSM at any time in the last 6 years,
- and children in care or have left care through a formal route

We also consider, beyond the above, those vulnerable pupils in need of help and statutory support from the LA social services. Became particularly important during the pandemic to ensure these pupils could access their learning.

When working with schools, key is the level of ambition for disadvantaged pupils compared to their peers - they should not be offered a reduced curriculum!
